U.S. DEPARTMENT OF AGRICULTURE

Agricultural Research Service—Animal Disease Eradication Division

Classification of Reactors Determined by Palpation Ventral Side, Caudal Fold

CIRCUMSCRIBED SWELLING

P = pea size

2P = 2 times pea size

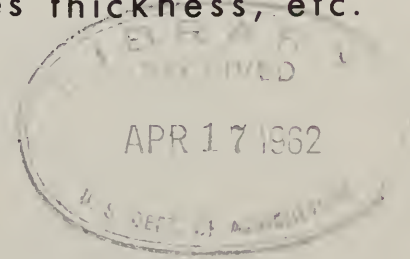

3P = 3 times pea size, etc.

DIFFUSE SWELLING

X = thickness of caudal fold

2X = 2 times thickness

3X = 3 times thickness, etc.

Vulvar injection interpreted and recorded in same manner.
Size and type of swelling does not indicate severity of disease.
